

WORLD OF PORTS

Valuable data at your fingertips

Pre-plan cost-effective port calls, carry out data-based marine assurance to mitigate risks, and identify new opportunities with the largest port and market intelligence digital platform powered by agents' verified data.

Make better and faster decisions with complete visibility of valuable port data and competitive information. World of Ports is a digital, cloud-based platform that combines global port data and vessel schedules provided by Inchcape's network of agents with AIS and geofence monitoring capabilities to boost operations performance and productivity while improving fixture profitability and competitiveness.

INCHCAPE
SHIPPING SERVICES 

THE LARGEST PORT INTELLIGENCE PLATFORM WITH AGENT-VERIFIED DATA

Platform overview

World of Ports (WOP) is a digital cloud-based platform that enables organisations to access enhanced port, terminal, and berth information for ports around the world, estimate port costs, track their fleets, analyse the timelines, and monitor the voyages of fleets and competition, so customers can plan cost-effective port calls, mitigate risks and identify new opportunities based on transparent information and data.

A scalable and flexible solution with a web interface that can be accessed from anywhere, anytime and with a dynamic real-time API service to integrate into any platform with ease.

Benefits:

- Easily plan, optimise and execute cost-effective voyages
- Mitigate risks
- Identify new opportunities
- Improve fixture profitability
- Increase efficiency
- Know where your vessel is at any time
- Make better and faster data-driven decisions

Key features:

- Global port, berth and terminal detailed information, including restrictions, services, and facilities
- Port, terminal, and berth real-time performance information to help compare waiting time, turnaround time and port stay
- Vessel historic track and port call information. View voyage length and the time vessel spent on ports
- Agent-supplied vessel berthing schedule for key ports
- Port cost estimator
- Integrated AIS, vessel data and weather tracking
- Geofence monitoring to keep an eye on congestion and high-risk areas
- Automated alerts and notifications
- Competitive monitoring and real-time port activity
- User-friendly web interface
- API services to integrate into any platform

WORLD OF PORTS ADVANTAGE

Agent-verified data, AIS and geofencing in one place.

OUR APPROACH

World of Ports is part of Inchcape's mission to use **technology** and our **global network** to help our customers and partners.

What sets us apart from the others is **quality of data** combined with **over 174 years of port agency experience** to deliver the best solutions to our customers.

OUR DATA

We combine **AIS data** with the information from Inchcape global network of port agents and subagents. This **data is enhanced and verified** by a dedicated team of experts.

We are constantly working with customers to identify any possible gaps and keep the data updated and of the **highest quality** possible.

THE EXPERTS

We have a team of **dedicated experts around the world** to ensure the collection, updating and verification of data.

The team is **headed up by a Master Mariner** with over 12 years of experience.
