

OneCape DA – External Release notes	
Release:	V11.3.0
Delivery:	12/12/2024

General Information:

The current release, v11.3.0 was delivered on 12/12/2024 The release schedule for OneCape DA is monthly and may change depending on circumstances.

The information in this document does not constitute a commitment, promise, or legal obligation to deliver any material, code, or functionality.

Should you require further information on individual features or have more general queries or feedback, please contact:

Celeste Hanly – Product Director: celeste.hanly@iss-shipping.com

Katt Johnson – Senior Product Manager: katt.johnson@iss-shipping.com

New Features

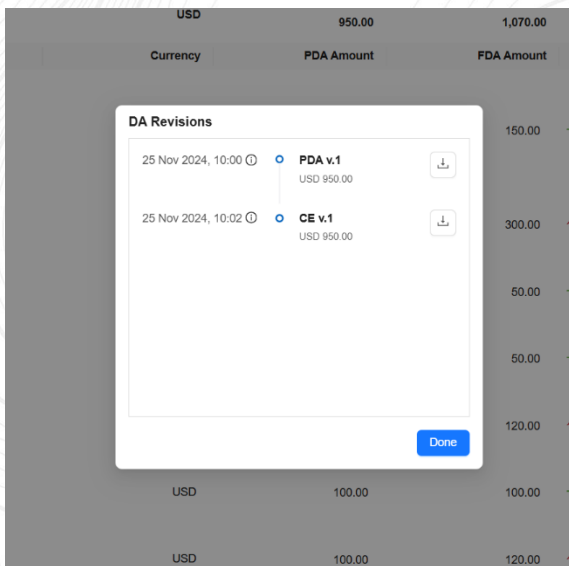

➤ DA Revision Documents

Challenge:

Historical DA revision documents were not accessible within OneCape DA, limiting visibility and ease of reference.

Functional enhancement and benefit:

You can now access and view all DA revision documents directly in OneCape DA. This enhancement improves visibility into historical revisions, streamlining access to critical information and enhancing overall usability.

➤ PDF Viewer

Challenge:

OneCape DA did not support in-app document viewing, requiring you to download each document individually. This made it challenging to compare documents attached to service lines efficiently.

Functional enhancement and benefit:

A PDF viewer has been integrated into OneCape DA, enabling you to preview documents in a new browser tab. This enhancement allows for quicker and easier comparison of documents attached to service lines, improving workflow efficiency and user experience.

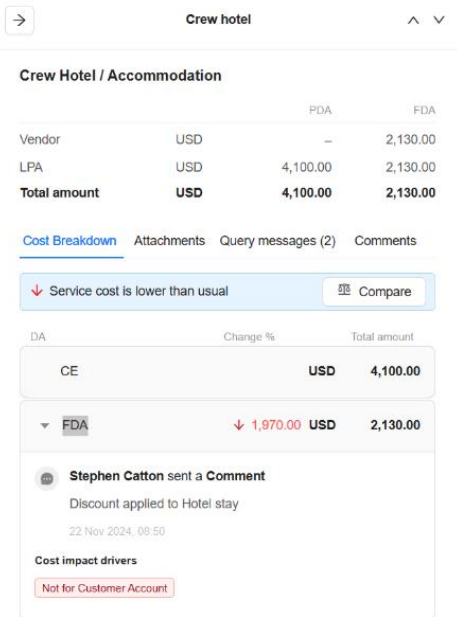

➤ **Calculation explainer**

Challenge:

You were unable to view additional comments from the Hub explaining the reason behind cost changes across different financial stages, limiting visibility into cost adjustments.

Functional enhancement and benefit:

The side drawer associated with the service line now includes additional comments from the Hub detailing the drivers behind cost changes. This enhancement provides greater transparency and clarity, enabling you to better understand the reason for increases or decreases in service costs.

Improvements

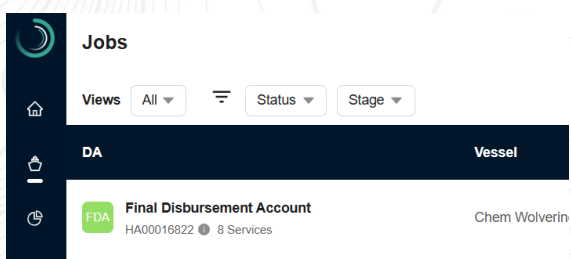

➤ **Filters for viewing all jobs**

Challenge:

The limited filter options (To do, In progress, Queried and Cancelled) on the “View All Jobs” page in OneCape DA made it challenging to refine searches, often resulting in overly broad search results.

Functional enhancement and benefit:

Enhanced filtering options have been introduced on the “View All Jobs” page, allowing for more precise searches. New filters include **Status**, **Finance Stage**, and **Job Status**, enabling users to quickly find the information they need. Additionally, filter configurations can now be saved for convenience or reset to default for a comprehensive job view.

➤ **Search criteria updates**

Challenge:

The existing search function in OneCape DA has limitations, making it difficult to locate key job-related information efficiently.

Functional enhancement and benefit:

The enhanced search function now supports keyword-based searches across additional parameters, including Vessel, Port, Operation, Operator, and Appointer. This improvement streamlines the process of finding specific job information, saving time and improving usability.

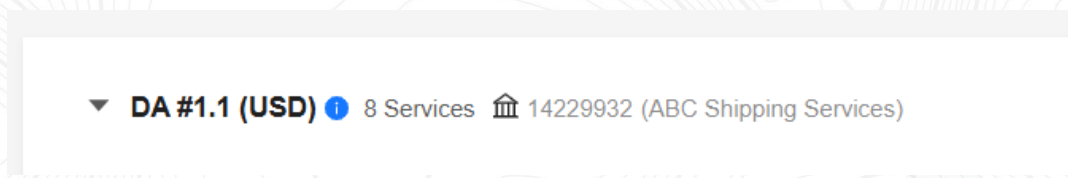

➤ **Bank account name included on bank details**

Challenge:

The bank account name was not visible in OneCape DA and could only be accessed by downloading the DA document, leading to inefficiencies.

Functional enhancement and benefit:

The bank account name is now displayed alongside the bank account number directly on the interface. This enhancement allows users to quickly view complete bank details without the need to download the DA document, saving time and improving convenience.
