New Features

➤ User & Group Management

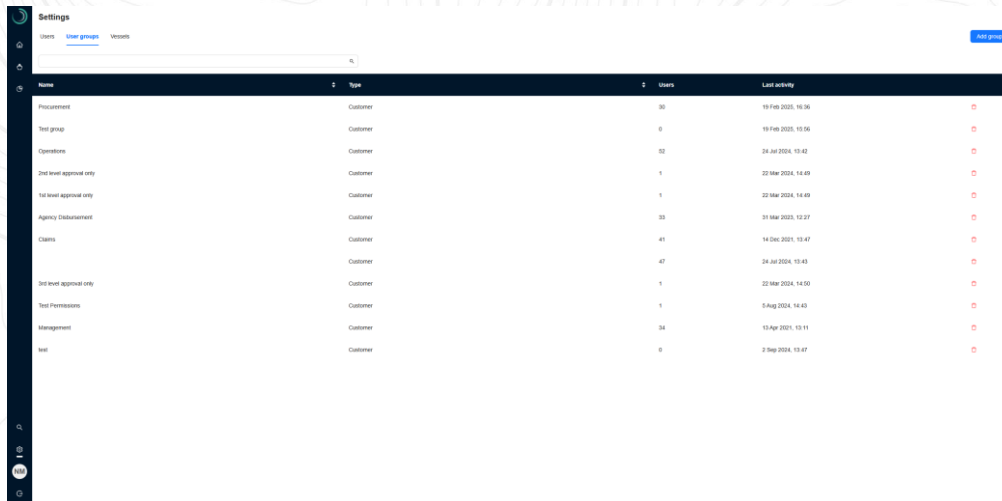

Challenge:

OneCape DA did not support user management within the platform, limiting administrative control and user access management.

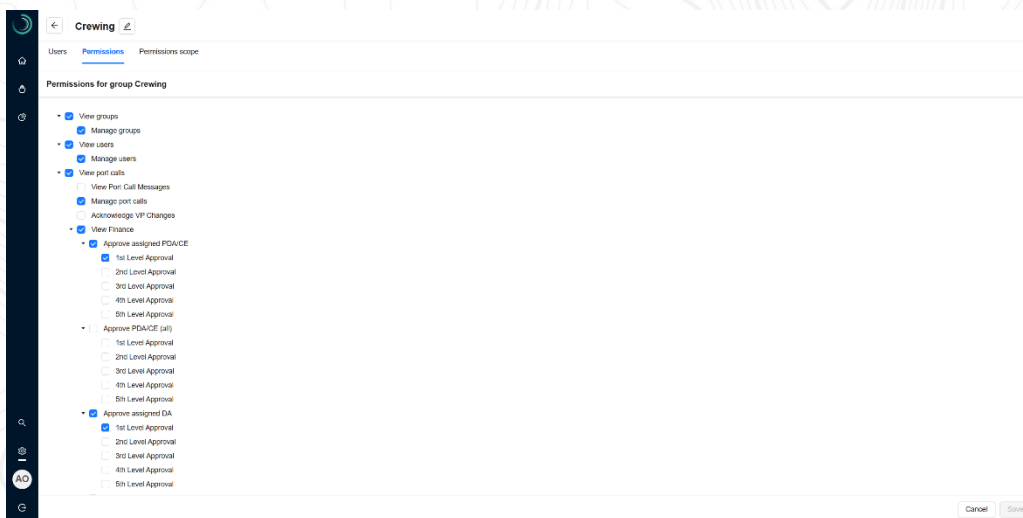

Functional enhancement and benefit:

The new User & Group Management feature now provides a centralized way of managing platform users efficiently in one place, simplifying administration and improving control over user access within the platform. You can now:

- Invite users to the platform
- Edit existing user details
- Disable users accounts
- Resend invitations to the platform
- Manage user permissions
- Manage user permission scope
- Manage user groups

Improvements

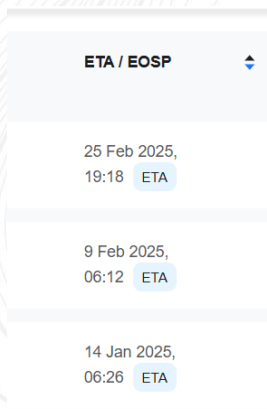

➤ Sort ETS/ETA/EOSP/COSP

Challenge:

You were unable to sort ETS/ETA/EOSP/COSP dates in the “View All Jobs” page, preventing efficient organisation of job listings from the latest to the oldest.

Functional enhancement and benefit:

You can now sort ETS, ETA, EOSP, and COSP columns by date, from earliest date to latest date. This enhancement improves efficiency by allowing users to quickly find and prioritise jobs based on key timestamps.

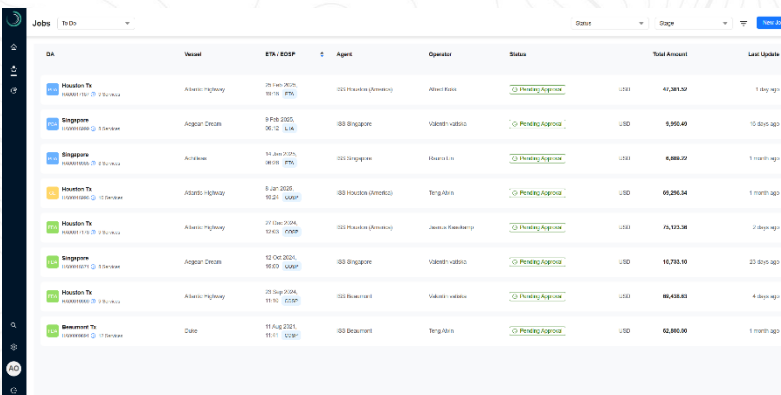

➤ Repurposed ‘To do’ filter

Challenge:

The ‘To Do’ filter on the “View All Jobs” page displayed all jobs requiring action from all users, making it difficult for the logged-in user to identify tasks specifically assigned to them.

Functional enhancement and benefit:

The ‘To do’ filter now only shows jobs requiring action from the logged-in user, making it easier to identify and prioritize tasks that need their attention.
