

OneCape DA – External Release notes	
Release:	V11.6.0
Delivery:	15/6/2025

Features:

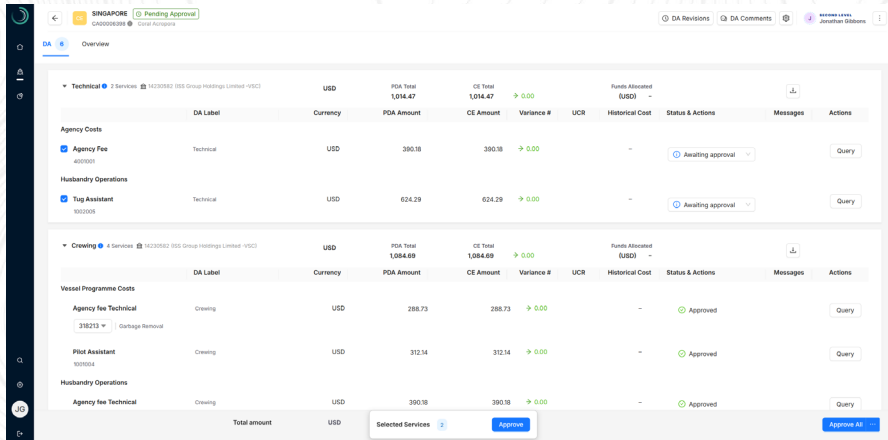

1. Multi-select approvals

What was the issue:

Previously, service lines had to be approved individually in OneCape DA, increasing the time it took to approve jobs.

Fix and Benefit:

You can now select multiple service lines using checkboxes and approve them in bulk, saving time and improving efficiency.

DA Label	Currency	PGA Amount	CE Amount	Variance #	UCR	Historical Cost	Status & Actions	Messages	Actions
Agency Costs									
Agency Fee	USD	390.18	390.18	0.00			Awaiting approval		Query
Husbandry Operations									
Tug Assistant	USD	624.29	624.29	0.00			Awaiting approval		Query
Crewing									
Vessel Programme Costs									
Agency Fee Technical	USD	288.73	288.73	0.00			Approved		Query
Pilot Assistant	USD	312.14	312.14	0.00			Approved		Query
Husbandry Operations									
Agency Fee Technical	USD	390.18	390.18	0.00			Approved		Query
Total amount	USD								

Improvements:

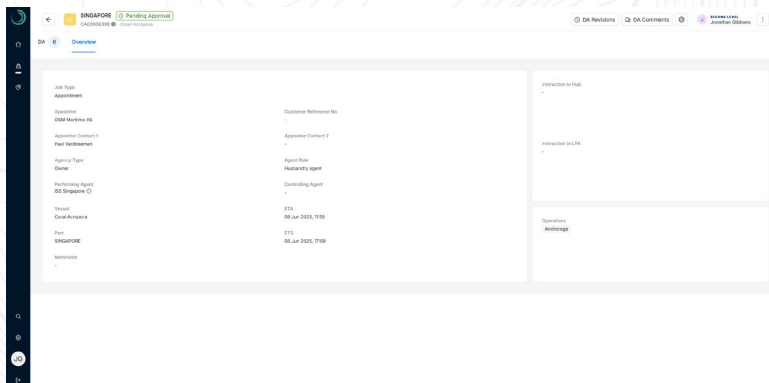

2. Job overview tab

What was the issue:

The job overview was not easily accessible, making it difficult to view the summary of the given port call.

Fix and Benefit:

A new tab has been added to the job details page called 'Overview' next to the 'DA' tab, allowing you to quickly switch between the job overview and the DA details.

Release:	V11.6.0
Delivery:	15/6/2025

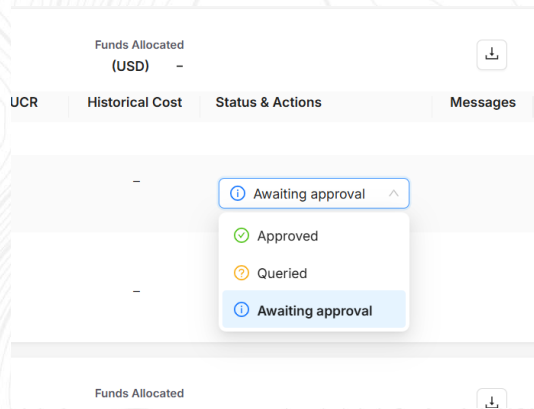

3. Service line approval/query

What was the issue:

When approving or raising a query against a service line, you had to click on each one to open the side drawer. This made the process time- consuming and inefficient.

Fix and Benefit:

The approval/query dropdown is now located directly on the service line, making it quicker and easier to review and Take action.

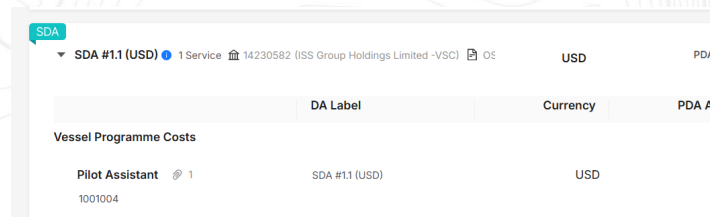

4. Supplemental DA indicator

What was the issue:

When a Supplemental DA (SDA) was added to a job, it wasn't clearly distinguishable from the original DA.

Fix and Benefit:

A banner has now been added to any SDA's added to a job, to clearly indicate that this is a supplemental DA.

Release:	V11.6.0
Delivery:	15/6/2025

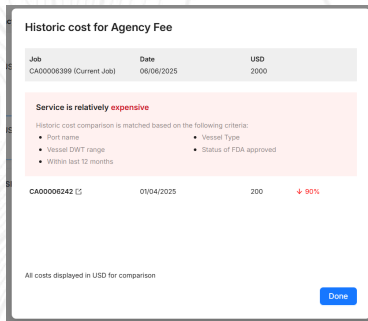

5. Historic cost information

What was the issue:

When showing historical cost calculations for the service lines, there was no information on how the historical costs were calculated. Thus, leading to queries raised on how these historical costs are determined.

Fix and Benefit:

When opening the historical cost modal now, there will be a breakdown displayed on how these comparisons are calculated, leading to less queries raised on how the costs are calculated.

Resolved Defects

1. Filters would not be saved on refresh

What was the issue:

Filters applied on the 'View all jobs' page would reset when the page was refreshed, disrupting your workflow.

Fix and Benefit:

Filters now remain in place after a page refresh, allowing you to continue your search without needing to reapply them.

2. Filters to display all jobs in the list

What was the issue:

In some cases, applying a filter returned no results, even when there were jobs that matched the criteria.

Fix and Benefit:

The filter logic has been improved to ensure all relevant jobs are displayed, allowing you to accurately filter and view all applicable jobs in OneCape DA.
