

OneCape DA – External Release notes	
Release:	V12.2.0
Delivery:	06/10/2025

Improvements

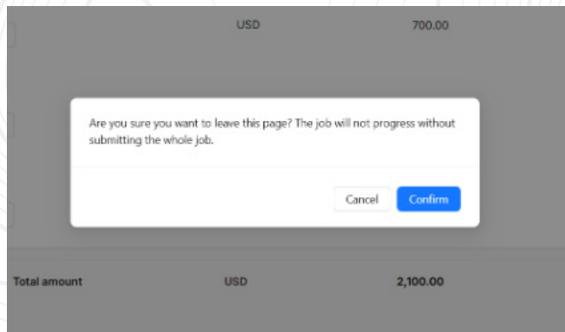

1. Additional information added to recent jobs

Port, Vessel and Customer reference number have now been added to the 'Recent jobs' section on the home page, providing more information about the job before navigating to the job itself.

2. Reminder to submit the job before leaving the page

At the point of approving all services or querying a service line for a job: when leaving the page without submitting the job, a message will appear prompting that the job will not progress to the next stage until the job has been submitted.

Resolved defects

1. Incorrect DA documents downloaded

What was the issue:

When downloading the DA documents, clicking on the DA Cover sheet option would download the DA Set document instead of the DA Cover Sheet with invoices attached.

Fix and Benefit:

This has now been resolved, and the correct document will download when clicking on the DA Cover Sheet option
