**Ref: Oman – UAE – In-transit cargo clearance Procedures**

Dear Valued Customer,

We would like to inform you that our team recently attended a coordination meeting with the Ministry of Transport, Communications and Information Technology (MoTCIT) regarding the latest operational procedures for cargo moving in transit through Oman.

Following the meeting, we have been advised to proceed in line with the currently issued guidelines applicable for UAE in-transit clearance. The key operational points are summarized below for your reference:

**24/7 Operations for Documentation Services:** The Documents Desk, including processing of Delivery Orders and Customs Manifests, will operate on a 24/7 basis to ensure uninterrupted service and timely documentation handling.

**Transit Bayan Process – Training:** A training session for the updated Transit Bayan process is scheduled on 16 March 2026 at Customs HQ Muscat to ensure all operational staff are aligned with the revised procedures.

**Manpower Management:** Necessary manpower arrangements will be maintained in all the offices to ensure smooth operations and avoid any disruption to documentation or clearance activities.

**Mandatory Offices for Shipping Lines:** Shipping lines are required to maintain an operational office in Sohar to support local coordination and logistics activities.

**Land Transport Declaration:** The Land Transport Declaration must be accurately completed and submitted as part of the regulatory compliance requirements.

**Return of Empty Containers:** Empty containers returning to Oman via UAE trucks must be deposited in the Sohar Freezone in accordance with the current operational guidelines.

Additionally, we understand that the Government of Oman is currently in discussion with the Government of Saudi Arabia regarding procedures for Saudi in-transit cargo. Once these discussions are finalized and official guidance is issued, we will promptly share further updates regarding the process for Saudi in-transit clearance.

Please feel free to reach out should you require any clarification or operational support.

Please find below POC for your guidance.
