

Features & Improvements:

1. Historic cost comparison at Job level

The new **Historic Cost Comparison at Job Level** feature provides greater visibility into how the cost of a job compares against similar historical jobs. You can now quickly identify cost trends, understand changes in service scope, and make more informed decisions when reviewing jobs.

Matched Services Analysis

Services that are present on both the current job and historical jobs are automatically identified and displayed as **exact service matches**. You can review cost differences for these matched services to understand pricing and spend changes over time.

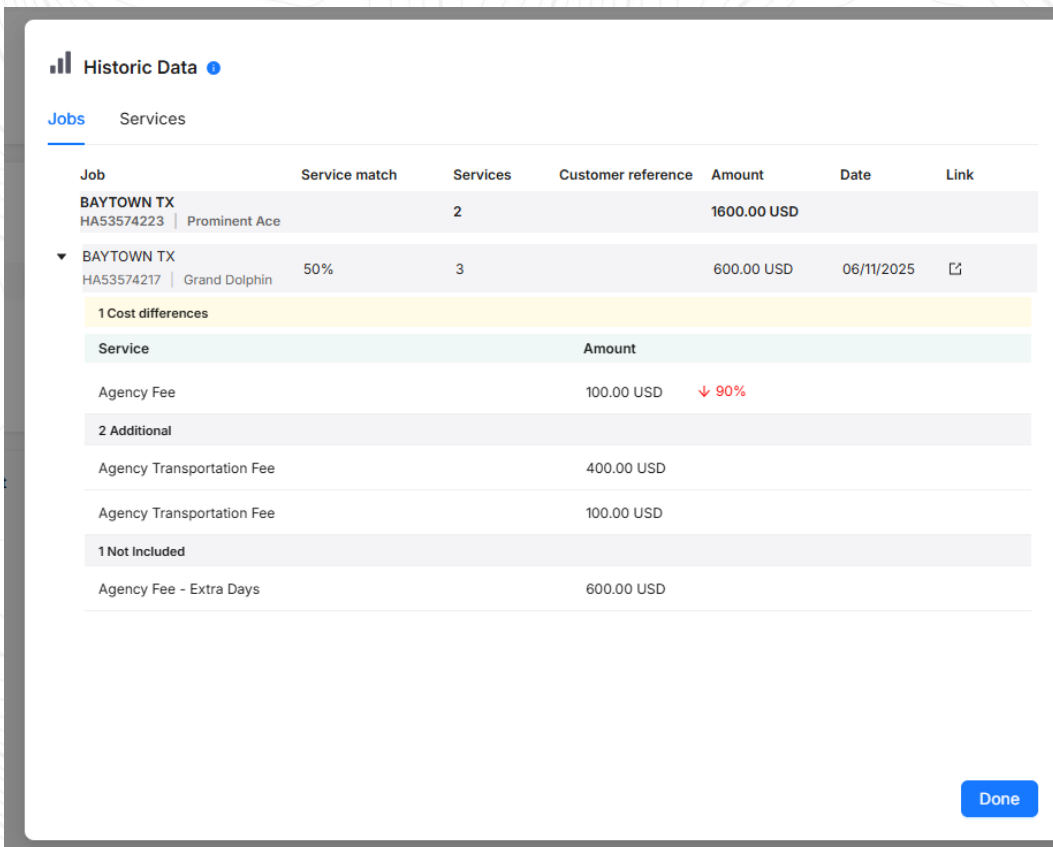

Service Scope Variance Breakdown

The comparison also highlights service differences between the current and historical jobs, including:

- **Not included:** Services that existed on historical jobs but are not included in the current job.
 - **Additional Services:** Services that have been added to the current job but were not present on the historical jobs.
- This breakdown provides a clear understanding of how changes in service scope contribute to overall cost variations.

Benefits

- Improve cost transparency across similar jobs.
- Quickly identify drivers behind cost increases or reductions.
- Understand changes in service composition between jobs.

Job	Service match	Services	Customer reference	Amount	Date	Link
BAYTOWN TX HA53574223 Prominent Ace		2		1600.00 USD
